Global Presence

Edios Global

Edios is pushing the boundaries of technology to design and develop Healthcare Solutions for improving Healthcare Practices. Edios has various innovative Healthcare Software Solutions which are being used by leading US Healthcare Organizations. Edios created frameworks that helps organizations to connect with Staff and Patients, allowing them to spend less time on paperwork and more time on delivering vital health care services.

Edios is a leading provider of software services in various domains. We help and guide our clients solve problems at scale, leveraging the tools and technologies. With a deep expertise and vast experience, we have been successful in providing services and our cost-effective services are directly aligned with the unique needs of each client. Since 2007, more than 100+ customers, have relied on our software services. Our achievements have resulted in long term relationships with our clients, working in partnership with them to make best use of our talent and technology while fulfilling their plans for the future.

Edios Healthcare Solutions

Edios RMS (Registry Management System)

User-Friendly, Powerful and Flexible Electronic Data Capture (EDC)

Edios “**RMS**” is advanced web based data capture and Management software for collecting, managing and reporting data. “**RMS**” has powerful and flexible design options and features for registry databases allowing you to create Web Based Forms and Questionnaires without the need for computer language programming expertise.

Edios eMaven (Healthcare Interoperability Solution)

Connecting disparate systems to maximize information flow in an application community

Edios “**eMaven**” is Healthcare Interoperability Solution for Healthcare Organizations to seamlessly integrate, manage, store, view, share and exchange Patient Personal as well as Clinical information. Edios “**eMaven**” is reliable, configurable and allows seamless transfer of electronic data between diverse software applications and electronic devices. Edios “**eMaven**” is designed with interoperability in mind and supports multiple standards based messaging architectures (HL7, DICOM, JMS, XML, SOAP, REST API etc.).

Edios eInfoGuard (Electronic Information Guard)

Data De-Identification Solution

Edios “**eInfoGuard**” (Electronic Information Guard) is a data de-identification tool which safeguards Protected Health Information (PHI). Our revolutionary solution provides an efficient, cost effective, and flexible method for individually masking each data field - offering the highest level of security while maintaining operational usability. Edios eInfoGuard assists Covered Entities and their Business Associates maintain regulatory compliance.

Edios EPRS (Electronic Patient Referral System)

Electronic Capturing of Lab and Imaging Results

Edios “**EPRS**” (Electronic Patient Referral System) is an automated solution for the integration of Health Data Sources (Labs, Radiology/Imaging Centers, and Medical Equipment) to Healthcare Systems (EMR/EHR, Clinical Software, Specialty Applications, and Databases). It is an end-to-end integration solution that ensures that accurate information gets to clinicians in a timely manner and in the correct format.

Edios HealthTrax

Facilitating Healthcare Services

Edios “**HealthTrax**” is a Mobile Platform – a one-stop shop for all health needs- and it’s continuing to improve. This app covers both Doctor and Patient. Doctors can schedule their appointments, accept and confirm the Patient appointments requests. Patients can view their health record, search for doctors, view hospitals, take appointment from doctors and much more.

We welcome the opportunity to meet you and to discuss,
"How can we help you to achieve your Business Goals"
